## ABOUT ME

Software engineer with hands-on experience in web and mobile development, focused on building user-centered designs. Built and deployed full-stack applications that integrate AI, APIs, databases, and cloud-hosted backend services.

## EXPERIENCE

### Student Frontend Developer — Capstone Industry Project

Aug – Dec 2025

Full Sail University Fitness Technology Lab | Echelon Fit

Winter Park, FL

- Selected for capstone industry program replacing traditional graduation project with real-world development work.
- Developed components for Echelon Connect Reflect Touch smart mirror using Kotlin and Jetpack Compose.
- Collaborated with design team using Zeplin to implement screen designs and UI components accurately.
- Managed workflow through Jira, working on feature tickets with dedicated branches merged into main repository.
- Participated in weekly progress meetings with project manager to report on ticket status and development updates.
- Shipped developed features directly into Reflect Mirror user interface.

### Student Tour Guide

May 2024 – Dec 2025

Full Sail University Touring Department

Winter Park, FL

- Led daily campus tours and represented the university at open house events for prospective students and families.
- Addressed questions and trained new tour guides on routes, presentations, and campus information.

## PROJECTS

### EasyCook — Recipe & Meal Planning Web App | React, TypeScript, Node.js, REST APIs

May – Jun 2025

[easy-cook.linettekuhn.com](https://easy-cook.linettekuhn.com)

- Developed personal cooking assistant designed for recipe lookup, meal planning, and pantry tracking.
- Led frontend development and integrated backend to enable authentication and persistent user data.
- Utilized React for UI components and ExpressJS to connect Spoonacular API and database services.
- Refined UI/UX based on feedback by adding smoother transitions, animations, and improved layout flow.

### Piggy — Budgeting & Expense Tracking App | React Native, TypeScript, Expo, SQLite

Oct 2025 – Jan 2026

[github.com/linettekuhn/budget-app](https://github.com/linettekuhn/budget-app)

- Published mobile budgeting app to track expenses and visualize financial habits with interactive charts.
- Developed core features including visual progress bars, pie charts, and intuitive spending insights.
- Used React Native with Expo for cross-platform UI development, integrating SQLite for local storage.
- Improved design after feedback by restyling colors and typography to enhance usability and user experience.

### Contexto — AI Dialect-Aware Translator | React, TypeScript, Vite, Framer Motion, GSAP

Feb 2026 – Present

[contexto.linettekuhn.com](https://contexto.linettekuhn.com)

- Built translation app with dialect selection, automatic language detection, and formality slider for tone control.
- Developed responsive animated UI using Motion, supporting dark and light themes across desktop and mobile.
- Implemented copy to clipboard, toast notifications, and real-time translation display for smooth and intuitive UX.
- Integrated with Node.js/Express backend deployed on DigitalOcean VPS to handle AI translation requests securely.

## EDUCATION

### Bachelor of Science in Computer Science (B.S.)

Sep 2023 – Dec 2025

Full Sail University

Winter Park, FL

- GPA: 3.99 | Class Valedictorian
- Awarded Women in Tech full-tuition scholarship

## TECHNICAL SKILLS

- Languages:** TypeScript, JavaScript, C++, Kotlin
- Frameworks:** React, React Native, Vite, Expo
- Web Technologies:** HTML, CSS, REST APIs
- Tools:** Git, Node.js, Docker, VPS (DigitalOcean)
